DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-10, 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Robinson (United States Patent No. 3,703,037 cited by applicant).

Robinson discloses a dental tool for use with an ultrasonic transducer 2 comprising an elongate tool 1 defined by a shaft 31 having an axis, a proximal end with means for attachment to the ultrasonic transducer, and a distal end with a tip configured for performing a dental procedure. A fluid passage 42 extends coaxially from the proximal end to the distal end and at an angle to the axis to a port configured and positioned to direct fluid onto the tip (see figure 2). The shaft has a bend at the distal end forming the tip 36 to extend at an angle to the shaft 31 with the port closely adjacent the bend. The shaft has an additional bend therein between the attachment means and the bend forming the tip.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3732

Claims 6, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson.

Robinson discloses the invention essentially as claimed except for the sharp point of the tip being about 1/64 inch in diameter (claims 6 and 11) or the tool being made of titanium alloy having 3.5 to 4.5 percent vanadium (claim 12). It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the sharp point of the tip 1/64 of an inch in diameter, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980). Regarding claim 12, it would have been obvious to one having ordinary skill in the art at the time the invention was made to form the tool of titanium alloy having 3.5-4.5 percent vanadium, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Allowable Subject Matter

Claims 18-22 are allowed.
